## Confirmation related to the nanofiber filtering membrane

To whom it may concern,

For the purpose of your company we hereby confirm a composition of the 2 layer nanofiber filtering membrane **NF MEM PA6-2-38 AG** with antibacterial properties suitable for the production of air filters and face masks with antiviral filtration efficiency 99.6 % for DEHS aerosol particles 0.3 µm in size.

Mechanically covered membrane with outer fabric layer can be treated by multiple wash/rinse at water temperature up to 60°C.

Yours faithfully,

Martin Budzák  
managing director
